

We Are

Based in Calgary (Canada), Conematic is one of the world's leading manufacturers of advanced heating solutions. Through innovation, Conematic developed Hybritherm Technology™ - the environmentally responsible heating system that creates a single, complete solution for space and water heating by leveraging the world's best technologies.

by Conematic

Conematic Advantages

Hybritherm Technology™: We combined the best technologies from around the world to meet your greatest need, worry-free comfort.

SOL series: Our SOL series line of products delivers cost effective and application friendly complete heating systems designed to meet and exceed current HVAC industry standards.

Simplicity of Integration: The only system that can integrate with in-floor, forced air, radiant heating/cooling and domestic hot water production in any combination, right out of the box.

Differentiation: Whether you are concerned with the environment, looking for an advanced heating solution, or want to reduce your energy bill, Hybritherm Technology™ will give you the advantage you are seeking to differentiate yourself from those around you.

Our Products Deliver
